

Ischemic Stroke 30-Day Mortality and 30-Day Readmission Rates and Quality Ratings for CA Hospitals

Home Data

Dive into comprehensive insights on ischemic stroke treatment in California hospitals with our interactive dataset preview. Uncover risk-adjusted 30-day mortality and 30-day readmission rates, quality ratings, and detailed statistics on the number of deaths, readmissions, and cases. Please note that this dataset focuses exclusively on inpatient settings, excluding information on ischemic stroke treated in outpatient setting

County	Hospital	Measure	Risk Adjusted Rate	# of Deaths/Readmissions	# of Cases	Hospital Ratings
Alameda	Alameda County Medical Center	30-day Mortality	14.63	9.0	205.0	As Expected
Alameda	Alameda County Medical Center	30-day Readmission	11.04	20.0	199.0	As Expected
Alameda	Alameda County Medical Center	30-day Readmission	8.21	14.0	183.0	As Expected
Alameda	Alameda County Medical Center	30-day Mortality	12.94	9.0	188.0	As Expected
Alameda	Alameda Hospital	30-day Readmission	18.66	18.0	92.0	As Expected
Alameda	Alameda Hospital	30-day Mortality	12.22	12.0	95.0	As Expected
Alameda	Alameda Hospital	30-day Readmission	17.96	22.0	117.0	As Expected
Alameda	Alameda Hospital	30-day Mortality	10.03	13.0	123.0	As Expected
Alameda	Alameda Hospital	30-day Mortality	10.28	124.0	16.0	As Expected
Alameda	Alameda Hospital	30-day Readmission	16.56	109.0	18.0	As Expected
